My name is Owami Mtshali, student number 51257629. For Assignment 2, I chose the career of Business Analyst. My logo reflects who I am as a person. I am a simple girl who finds joy in a few meaningful things. Sunsets inspire me because they symbolize rest and reflection, unlike sunrises that signal the rush to wake up and work. I enjoy pairing a sunset with a cute girly drink and a pastry. I also love road trips, which give me a sense of freedom and rest. I am currently studying to become a cybersecurity analyst, and my logo also includes painted dots to symbolise my love for art. I struggled with deciding what to include. Like materialistic things that I love, if I am describing myself does it make sense to include my devices as part of my description?
